The nutritional supplement that prevents and fights anemia. ❤️

Ferro Quinoa is a delicious food supplement based on red quinoa and fortified with heme iron, which helps to prevent and treat anemia at any age as it favors the assimilation of iron in the body quickly and safely.

It is an instant powder supplement that is taken diluted in milk or water, sweetened to taste.

How was it born?

Anemia (iron deficiency) is one of the main public health problems and it is associated with poor nutrition. The family diet in our country contains low content of meats (those that provide heme iron). In Peru, more than 40% of children under the age of 3 years suffer from anemia.

In response to this problem and after a process of research and consultations with specialists in medicine and nutrition, our company set out to develop a nutritional supplement high in iron content.

Made of natural superfoods from Peru.

Red Quinoa

Andean cereal, a red variety that stands out for its protein, gluten-free, nutritious and antioxidant potential that favors the development and growth of the child.

Camu camu fruit

Tropical fruit from our Amazon that has the highest content of Vitamin C (100 more times than lemon). It is antioxidant, anti-inflammatory and antimicrobial.

Heme Iron

Fortified with Heminic Iron, which is more easily absorbed than any other type of iron, since its bioavailability in the body is greater and its assimilation is immediate.

Spices

Cinnamon and cloves of the best quality (100% natural) that provide a delicious flavor. Cinnamon helps to control bad cholesterol levels and also regulate glucose level.

Sugar free

No preservatives

No colorants

No flavorings

No artificial additives

Enjoy FerroQuinua at any time of the day.

Ferro Quinoa is a red quinoa, cocoa, cinnamon, heme iron and camu camu fruit powder mix.

Data sheet

SANITARY REGISTRATION:

P2880121N LLISTC

INGREDIENTS:

Gelatinized red quinoa flour, alkalized cocoa, cinnamon powder, heme iron, anti-caking agent (E-500ii), atomized camu camu fruit and thickener (E415).

STORAGE CONDITIONS:

Cool place ($T^{\circ} 18 - 25^{\circ} C$), dry (RH: 80-90%) and not exposed to sunlight.

SHELF LIFE:

12 MONTHS

How to use

PREPARATION:

Dissolve a teaspoon of Ferro Quinoa (4g) in 200 ml of hot water or milk and sweeten to taste. Each serving (4 gr) contains 6.8 mg of heme iron.

RECOMMENDED DOSE PER DAY:

1 teaspoon: Prevention of anemia and nutritional supplement.

1 1/2 teaspoon: Treatment of mild and moderate anemia.

2 teaspoons: Severe anemia, aggressive weight loss due to catabolic changes.

FerroQuinua is elaborated with quality standards.

Where is it produced?

Throughout the development process we had the valuable support of **Instituto Tecnológico de la Producción - ITP** and **CITEagroindustrial Chavimochic**; at whose plant, located in the region of La Libertad in Peru, Ferro Quinua is currently produced. The plant is validated with HACCP, which ensures Good Manufacturing Practice (GPM).

Preliminary tests and trials

In October 2019, **ITP** and **CITEagroindustrial Chavimochic** carried out, in addition to laboratory tests, acceptability tests with children from an initial school in Virú - La Libertad. The results of these tests were very positive; the children gladly enjoyed the delicious taste of Ferro Quinua.

Choose the presentation that best suits to your needs.

The product is packaged in glass containers of 100 g. The glass container helps to preserve the properties of the product.

Glass container of 100 g,
equivalent to 25 servings of
4gr (1 teaspoon).

Sachets of 4g (one serving),
for easy handling and doses
administration.

Specifications

PACKAGING:

Generic glass container.
Suitable for export.

N° PACKAGES PER BOX / BOX

DIMENSION:

Products per box: 24 units (100g)

Box dimensions:

Length: 40 cm

Width: 30 cm

Height: 17 cm
